Non-Irrigated Capability Class - Dominant Condition "NICC"

- C2. Soils have moderate limitations that reduce the choice of plants or require moderate conservation practices.
- C3. Soils have severe limitations that reduce the choice of plants or require special conservation practices, or both.
- C4. Soils have very severe limitations that restrict the choice of plants or require very careful management, or both.
- C6. Soils have severe limitations that make them generally unsuited to cultivation and that limit their use mainly to pasture, range, forestland, or wildlife food and cover.
- C7. Soils have very severe limitations that make them unsuitable for cultivation and that restrict their use mainly to grazing, forestland, or wildlife habitat.
- C8. Soils and miscellaneous areas have limitations that preclude commercial plant production and that restrict their use to recreational purposes, wildlife habitat, watershed, or esthetic purposes.
